Create Assembly

AI enabled query and action manager within VDC Collaboration

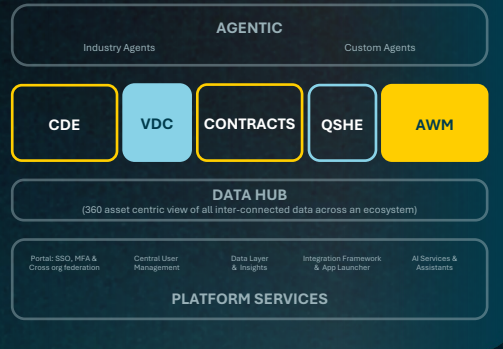

An information and
action assistant for
BIM Models

The screenshot shows the **thinkproject** **Assembly Manager** interface. The header includes the logo, a dropdown menu for "Demoproject THINKPROJECT CDE", and user information (BO). A sidebar on the left contains navigation icons. The main content area displays a table with the following data:

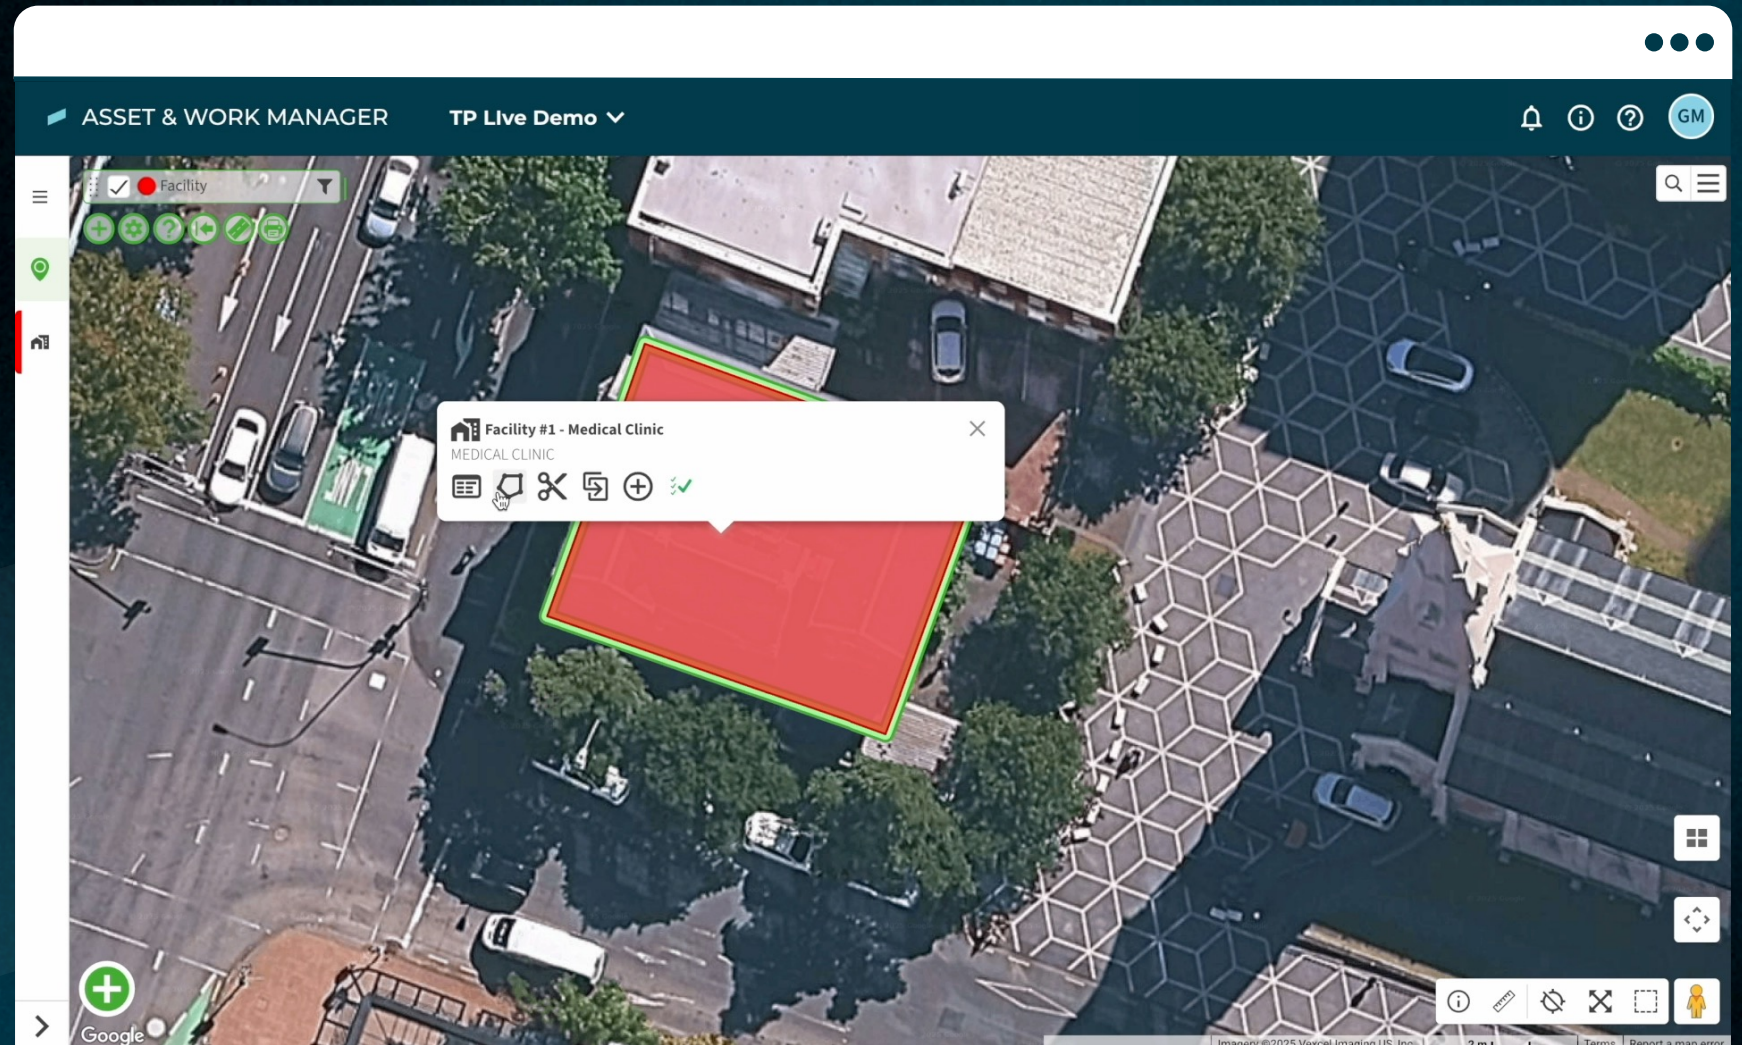

Action	Assembly name	Description	Created at ↓	Updated at	Created by	
□	⋮	Clinic demo project	Sample project	30/09/2025 07:53	30/09/2025 07:53	Badr Ouahbi

Below the table is a large empty space for additional content or actions.

New solution for QSHE and Field Management processes

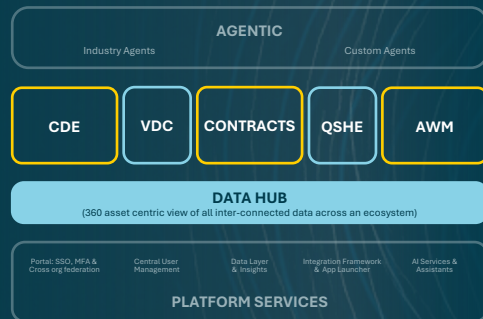

Our new dedicated
QSHE Field
Management
solution

The screenshots demonstrate the thinkproject software interface across different devices and views:

- Desktop View (Tasks):** Shows a table of tasks with columns: Id, Aktion, Titel, Typ, Status, Priorität, Erstelldatum, and Location. The table lists several tasks, including "Issue KO" and "CLASH [15]: Quer_0001 - Quer_0001".
- Desktop View (Field Management Form):** A multi-step form for field management, including sections for:
 - 1. Project and personnel:** Fields for Date, Time, Briefing Delivered by, Designation, and Brief location of works (ISO8601).
 - 2. Work Briefing:** A text area for Planned works for Shift.
 - 3. Risks in Work Area:** A text area for additional information like Plant movement, Traffic Management, Material Deliveries and offload Lift plans.
 - 4. Work Force Sign-off:** A table for Name and Signature.
 - 5. Permits in place?:** Checkboxes for POWRA, Hot Works, Permit to Load/Unload, Confined Space, and Derogations if applicable.
 - 6. Briefing Sign-off:** A final sign-off section.
- Mobile App View (Observations):** Shows a list of observations with details like "In planning Process #1", "There is a medium pipe leak, probably due to.", and "Building A, Floor 2, Room 3 6 photos • 11 files".

The screenshot shows the thinkproject login page. The header features the 'thinkproject' logo. The main heading is 'Login', with a cursor icon pointing to it. Below the heading, the text 'Enter your email address.' is displayed. A text input field labeled 'Email address *' is shown, with a red eye icon for toggling visibility. Below the input field, there is a link 'Resend Welcome Email?'. A 'Next' button is positioned below the link. At the bottom left, there is a 'Help' link, and at the bottom right, there is a language selector 'EN' with a dropdown arrow. The right side of the page features a large banner with the text 'Announcing: AI for the Built Environment' and a sub-headline 'Thinkproject AI brings intelligent assistants, services, and agents into our platform – unlocking unprecedented gains in productivity and efficiency across asset building and operations.' A yellow button labeled 'Watch AI announcement' is located below the sub-headline. The background of the banner shows a city skyline at night.

Thinkproject AI: New AI Capabilities within the platform

New: AI features on the platform layer and the application layer plus an additional Agentic AI layer – availability from end of Q4/2025

Thinkproject Platform

Built Asset Lifecycle Platform

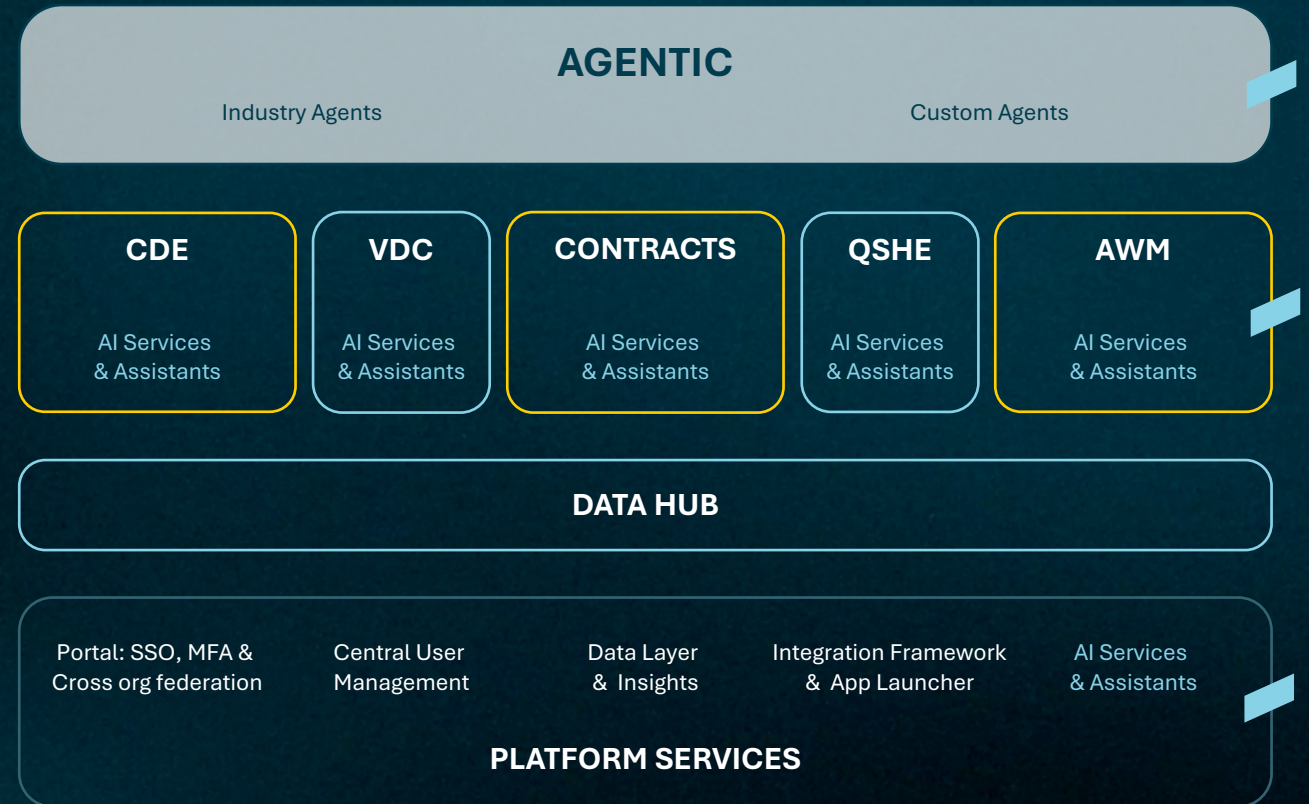

Thinkproject AI

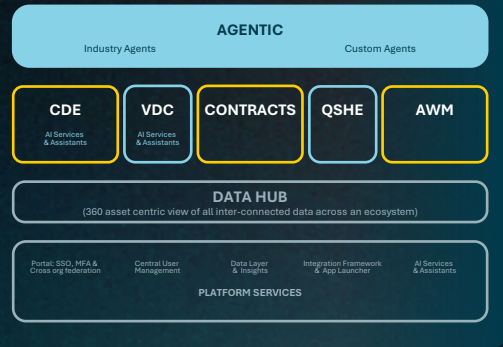

1. Thinkproject Platform-wide AI Services and Assistants
2. Thinkproject AI Services and Assistants for our applications on the platform
3. Thinkproject AGENTIC

Thinkproject AI: New AI Capabilities within the platform

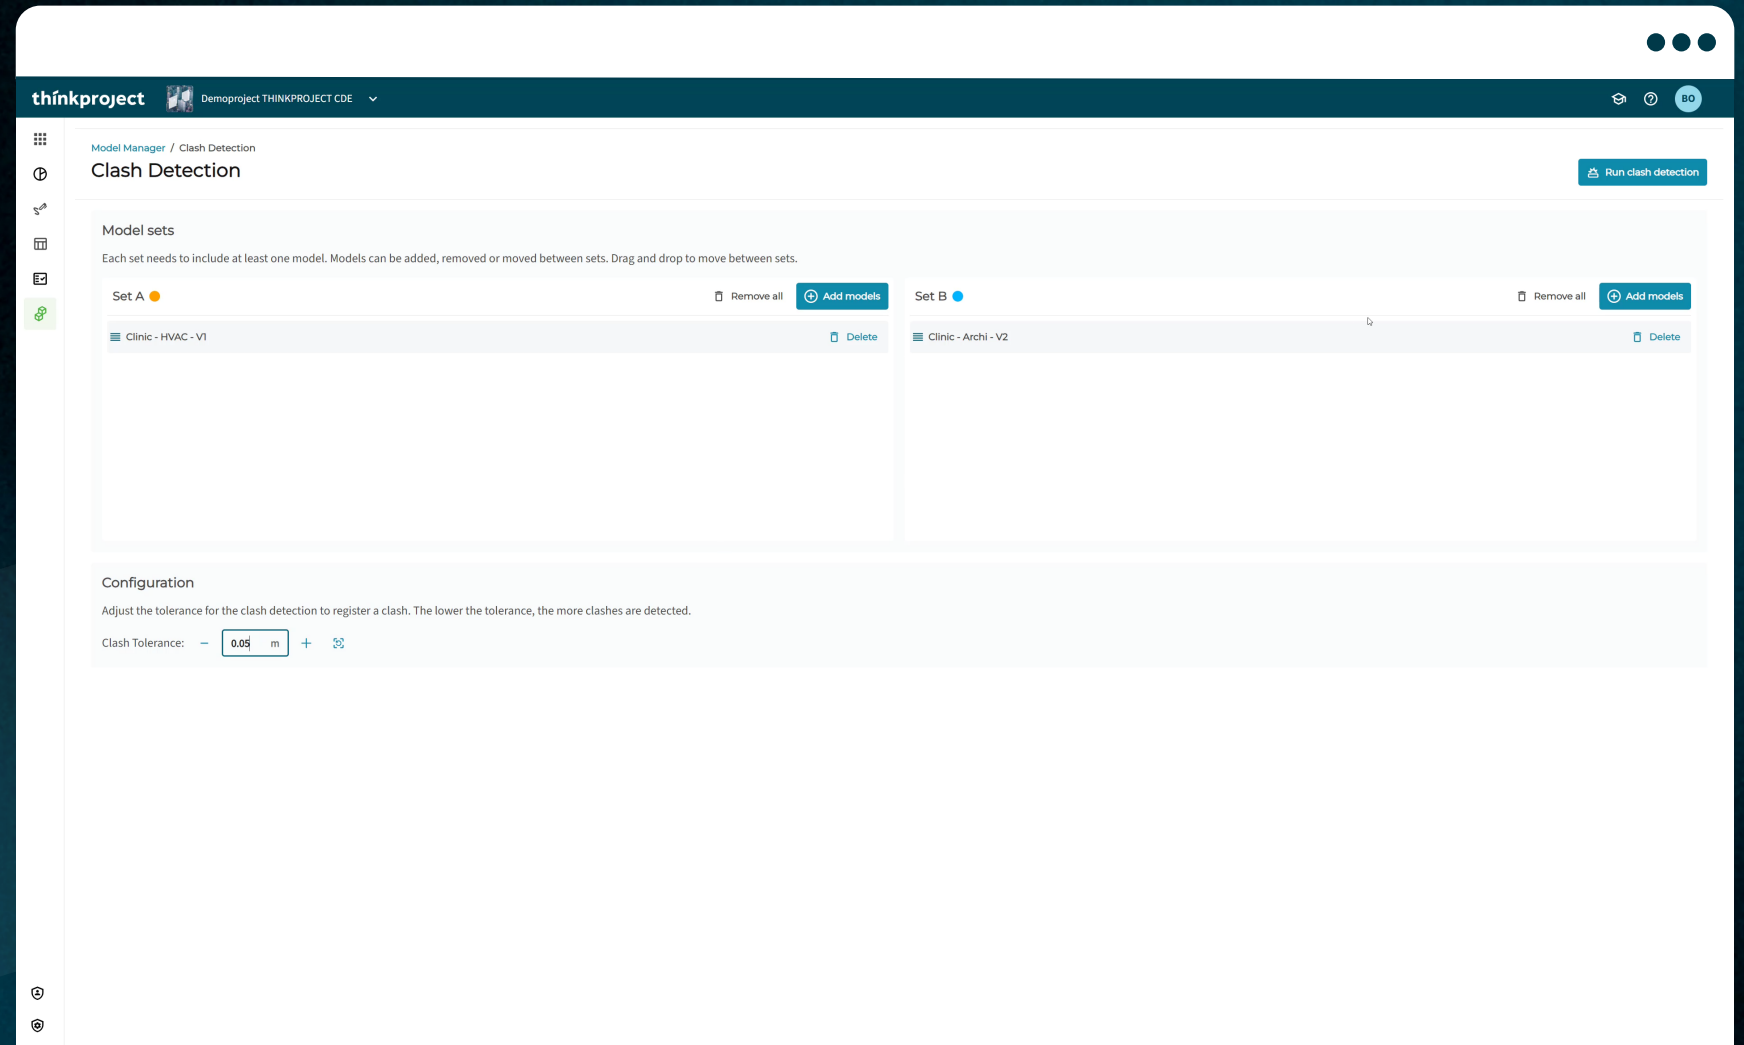

Agents come out of the box or deployed for custom use cases for large customers.

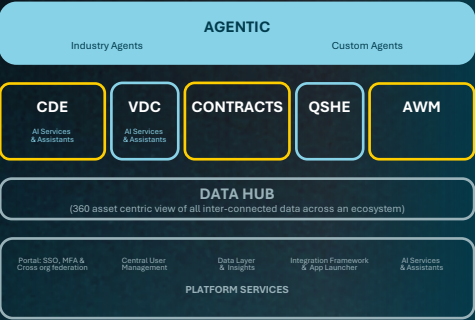

Industry Agents

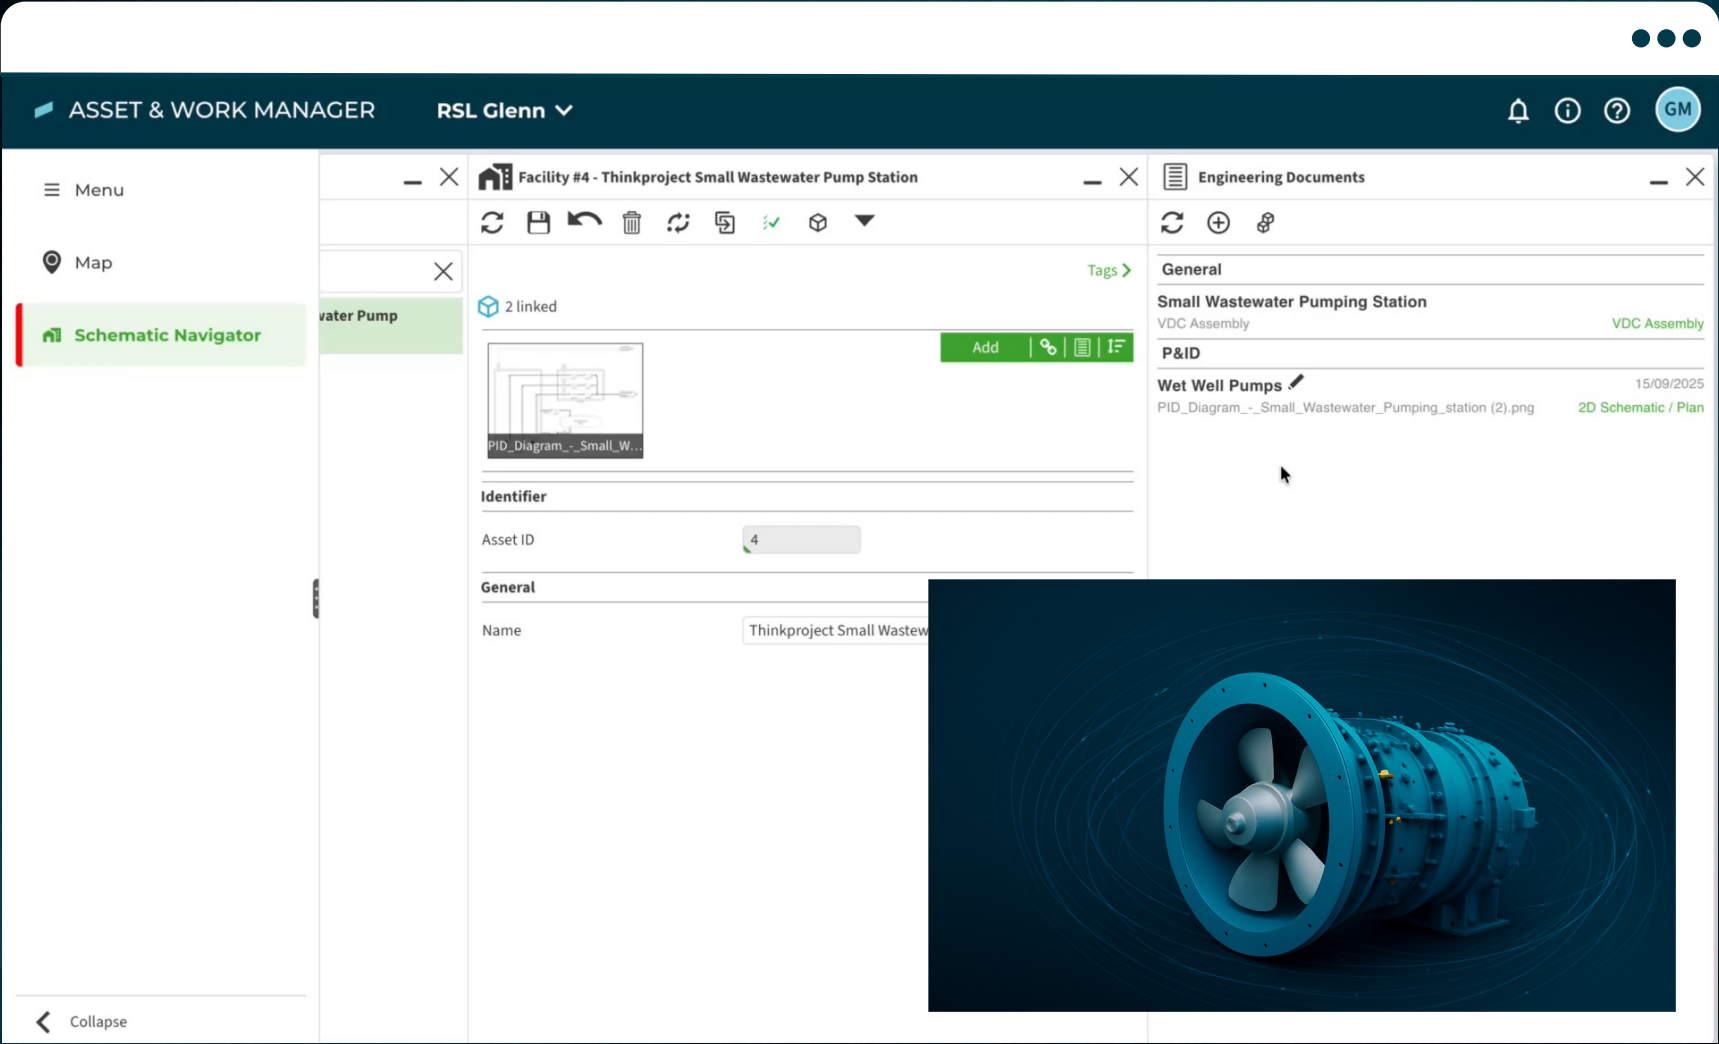

Industry specific agents for large variety of standard use cases cross industries

Custom tailored AI Agents

Custom use cases
for large customers.

Thinkproject IQ

le nouveau service d'innovation basé sur l'IA

A new innovation service for large Enterprises

A team of AI experts working with them to identify high value, bespoke use cases for AI agents

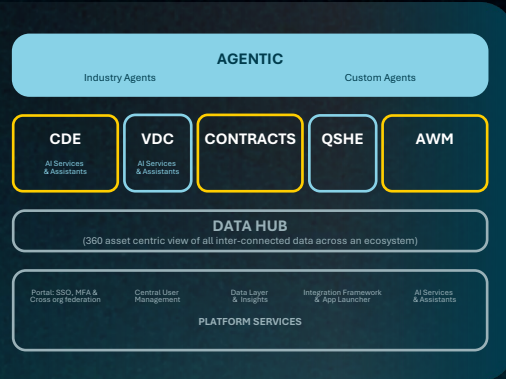

Rapid design and deployment of custom AI agents in the Thinkproject AGENTIC layer of the platform

The Thinkproject is the best option to start your transition into an AI-powered future

Thinkproject AI Governance

Controlled,
Compliant and
Consistent
AI Deployment

01

Legal & Compliance

Aligned with the EU AI Act: Responsible & risk appropriate use of AI.

02

Data Residency

Hosted in regional instance
Customer data never leaves region

03

Security & Model Control

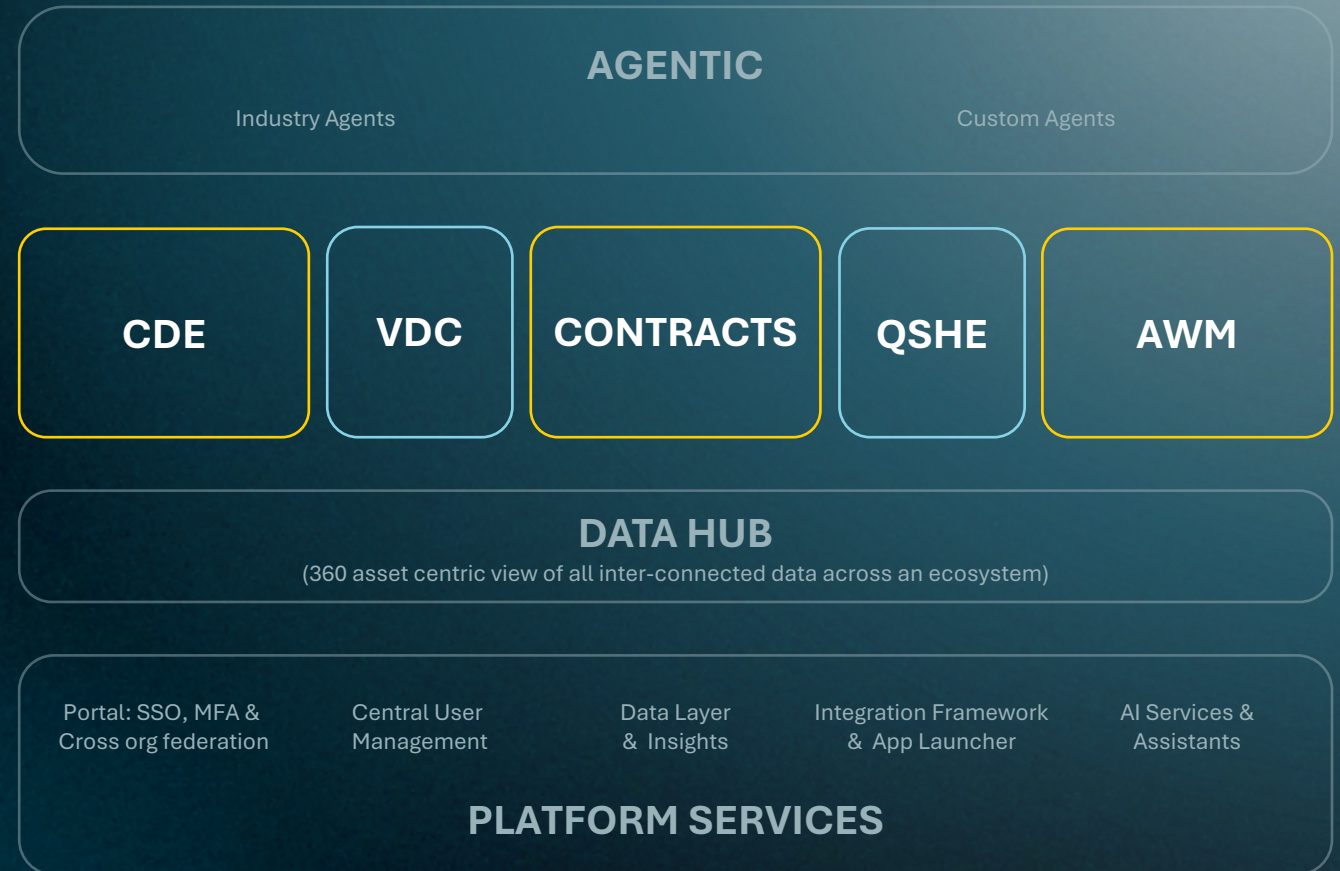

Trusted "Model Garden" using pre-selected models.
Your data is never used to train AI models

How we evolve the leading Built Asset Lifecycle Platform

The platform gets AI features on the platform layer and the application layer

Thinkproject Platform

Built Asset Lifecycle Platform

Take the first steps now

Choose any module to start your journey:

With Asset Work Manager syncing asset data with field work to maximise uptime during operations

With a Common Data Environment uniting all files, models, and workflows in one workspace

With Contracts to take full control of your contracts, related events and workflows

Make your digitalisation plans future proof

Lead with a bold vision

Start now

Switch your current solution on to the platform

Explore and activate other solutions available to you

Assess all your business functions for a rapid update

thinkproject
